

DOYMA Sealing systems for pipes and cables

Preventing structural damage

DOYMA GmbH & Co

We are the sealing systems specialists for pipes, cables and ducts running through walls, ceilings and floors.

With its headquarters in Oyten near Bremen and branches in Austria and the UK, our company employs about 120 people in the production, development and sales of our products, both at our company offices and in the field. Continual training of our employees, dialogue with our partners and a constant eye on potential market problems ensure that our brand receives the best possible support - both nationally and internationally.

A twenty-five-year warranty, innovative product development, targeted involvement in construction projects, trained sales teams offering

expert advice are just some of the services we provide.

This ensures our superiority in the provision of systems and makes us unbeatable down to the very last detail.

Add to this client loyalty and competitive prices, and you have the ideal foundations for a successful partnership. A presence at leading national and international trade fairs, and the provision of specialist seminars and product training sessions for our partners secures our pre-eminence in the field of sealing systems for service ducts.

Curaflex® C/M Gasket insert

Curaline® BKD 150 Cable duct

Doyma DL B Link chain

The DOYMA concept

For over 30 years DOYMA has been manufacturing and distributing sealing systems for pipes and cables.

Wherever service ducts are installed through walls, ceilings and floors and penetrating water, other liquids or humidity may cause damage to buildings, DOYMA sealing systems ensure professional and perfect sealing, thus preventing structural damage.

- Curaflex® sealing systems, consisting of
 - Curaflex® gasket inserts and
 - Curaflex® pipe sleeves
- Curaline® cable ducts
- DL Link chains

These are the product lines and components which are designed to enable a safe and lasting sealing of pipes and cables running from outside into a building.

25 Years
Guarantee
on all DOYMA products

DOYMA guarantees to:

- replace the defective DOYMA product
- reimburse the required installation and removal costs up to a max. amount of 10.000 €
- reimburse the cost of all property damage up to a max. amount of 100.000 €

Providing construction with permanent protection against structural damage.

Pipes and cables are used to supply industrial plant, along with commercial and residential buildings. All too often the focus of attention is restricted to the function of water, gas, electricity or data supply. Little attention is given to the sealing and housing of the pipes and cables passing through the walls or ceilings until it

is too late and structural damage has already occurred. Doyma offers top quality, tried and tested ducting systems which ensure lasting protection against water and insulation against noise and fire. Doyma therefore provides excellent preventative measures against structural damage.

Common problems

The annular gap around a pipe is sealed with foam. Foam loses its dimensional stability over the course of time and the seal is therefore not tight. Water can enter into the building.

All ducts which are directly installed allow water to penetrate the outside wall. Settings of constructions and thermal movements induce cracks through which moisture can penetrate.

Moisture will cause structural damage. But also damp and musty air often has a bad influence on people and equipment within a building.

Cable ducts leading from outside into a building are a very sensitive and exposed area of domestic electrical installation. Trying to save money means acting carelessly and jeopardizing human life.

Doyma solutions

A Curaflex® C gasket insert with its corrosion-protected steel rings and long-lasting rubber seals offers a permanent, flexible seal for service ducts against pressing water – moisture cannot penetrate the wall.

Pipe and cable ducts sealed with flexible Curaflex® C gasket inserts against pressing water can compensate for settings and movements, thus keeping moisture out.

A Curaflex® C/S gasket is available for all pipe outer diameters and even when in non-centric positions pipes can be perfectly sealed against pressing water. Moisture will stay out, the building is permanently protected.

A Curaflex® C/M gasket insert allows to seal up to 20 cables against pressing water and protects them against damages.

Providing a permanent seal for pipes and cables

Curaflex® gasket inserts
Profile delivers top performance!

Curaline® cable duct system
Click - it's tight!

Doyma DL link chains
A chain of benefits!

Curaflam® fire protection systems
Faster than fire!
